

## Laboratory Director's Safety Summit

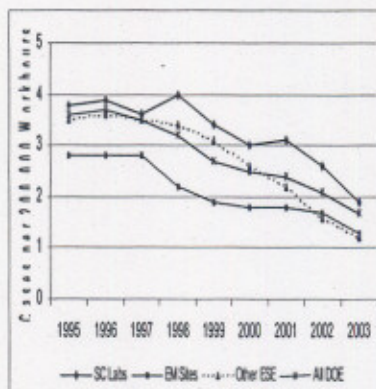

January 23, 2004

Lab Dir Mtg 1

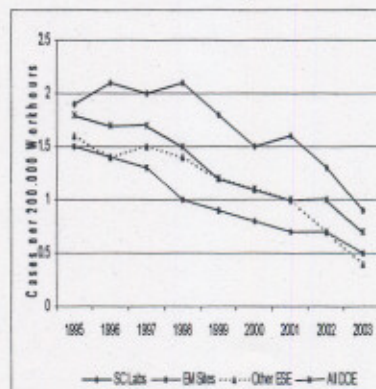

## SC, While Significantly Improving, Continues to Lag Other Programs – No Rationale for This is Obvious

Recordables

Lab Dir Mtg 2

Lost Work Days

## **We Also Have Continuing Concerns in Other Statistical Areas**

- Electrical
- Hoisting and Rigging
- Equipment
- Etc.

Lab Dir Mfg 3

## **Site Performance is Highly Variable**

- Sites that appear to have improving trends
  - PPL
  - Ames
- Sites that are continuing areas of concern
  - ORNL
  - BNL
  - LBL
  - PNNL
  - TJNAF
  - SLAC

Lab Dir Mfg 4

## Possible Causes Or Solutions

- Lack of senior management team personal involvement
- Lack of cascading personal responsibility
- Lack of enforcement at the first line supervisor level
- Lack of a clear message to employees (actions more than words)
- Lack of an effective employee feedback process

Let's Do It Right 5

## Some Special Points

- We see performance weaknesses in safety or other areas as indicative of potential weaknesses in all areas
- SC has a special worker risk and public exposure risk with "users"
